1 Shipped Product and Version

Open-Xchange OXUpdater 7.4.1-rev6

Open-Xchange OXtender 2 for Microsoft Outlook 7.2.4

2 Bugs Fixed since previous Public Patch Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Release 7.4.1.

30389 Outlook does not synchronize mails in INBOX
New Mails have not been synchronized to Outlook because of temporary disabled folders if error status 17 (success, some objects not exported) was returned by usm. Syncing worked fine after a restart of Outlook. This has been fixed by not stopping the sync when status code 17 is returned.

3 Tests

The OX QA team has successfully reproduced the reported issues and verified all bug fixes within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All bug fixes have been checked for potential side effects and changed behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
