

## **Release Notes for Patch Release #1841**

January 28, 2014

### **Security Patch Release**

This Patch Release addresses critical vulnerabilities; please consider deploying it as soon as possible. Not deploying this Patch Release may result in remote service exploitation, security threats to users and exposure of sensitive data.

Detailed vulnerability descriptions will be publicly disclosed no earlier than five (5) working days after public availability of this Patch Release. There is no indication that one or more of these vulnerabilities are already getting exploited or that information about them is publicly circulating.

## 1 Shipped Product and Version

Open-Xchange AppSuite backend 7.2.2-rev31

Open-Xchange OX6 backend 7.2.2-rev31

## 2 Bugs Fixed since previous Public Patch Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #1796.

### **30820 CVE-2014-1679**

CVSSv2: 5.7

Researcher credits to joernchen of Phenoelit

### **30571 Signature title gets garbled using Hindi characters**

Snippet attributes were read wrongly from associated MIME data, but not simply loaded from database

This has been fixed by reading snippet attributes from database.

### **30269 Contact from distribution lists is getting removed on updating contact when the contact is part of multiple distribution list**

When updating distribution list members that are referencing a contact that was moved to another folder, this update was not reflected correctly in the distribution list due to missing information about the previous parent folder.

The fix is that the contact service now passes the original contact as well as the updated contact down to the storages so that the original parent folder can be identified correctly.

## 3 Tests

The OX QA team has successfully reproduced the reported issues and verified all bug fixes within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All bug fixes have been checked for potential side effects and changed behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

30820, 30571, 30269,
