January 21, 2016

1 Shipped Product and Version

Open-Xchange Guard 2.2.0-rev9

Find more information about product versions and releases at `http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning_and_Numbering`

2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2970.

42122   "reset guard security password" doesn't ask for changing temp password
After choosing "reset guard security password" the user is able to use the current session to decrypt guard mail and appsuite doesnt ask to change temp password. Only a relogin changed this behavior.
Now, after password reset, trigger password change prompt when opening next email.

42754   No answer below answered e-mail in guard possible
An User with a mail formatted in HTML, send through guard. He wasn't able to answer to that e-mail and to place an answer below the last lines.
This has been fixed by adding a blank space below the reply text to allow the editor to insert.

43166   NullPointerException on "guard test"
This was caused by an unusual scenario with the displayName set to null. Currently, the backend prevents this from happening.
Guard test will now properly handle this.

3 Changes relevant for Administrators

3.1 Changes of Configuration Files

Change #2995   Default language settings overwritten with updates. Move setting to guard.properties file
The configuration file setting com.openexchange.guard.defaultLanguage will be added to the configuration file. This value will be used for the default language if not specified by the client.
`Added`

```
# Default Language

# Set to fallback language if not specified by the client.  Will be
# used for the templates sent out.  Please make sure the translations are
# present in the l10n directory

# com.openexchange.guard.defaultLanguage=en_US
```

4 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.
    To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.
    All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs
