2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #3059.

44082   Guard 406 "Not Acceptable" error when attempting to send encrypted mail without PGP key and choosing Cancel when prompted to create a new one
Canceling the "create new keypair" let to an error message.
If delete last private key and hit cancel when prompted to new, will now prompt for new account creation next time lock symbol activated.

44433   Guard not displaying cid images in decoded emails
In same cases it was possible that images from decoded emails can not be viewed/decoded.
Solution: Parse all multiparts of a message for a content-id attachment and for file attachment by name.

45074   HTML editor lacks translations to French
Headings were not translated to French.
This has been fixed by correcting the translation keys from Header to Heading.

44007   OX Guard Addresses with umlauts: ban symbol instead of green man/key sign
Guard did not encode domain part of incoming recipient addresses.
This has been fixed by adding ASCII Compatible Encoding for incoming recipient addresses.

43962   Sending mails from IDN-domains not possible
Guard does not ASCII-encode domain part of the sender's email.
This has been solved by adding proper ASCII Compatible Encoding.

44983   Unable to decrypt larger files in OXDrive
User were not able to decrypt larger files.
To solve this issue com.openexchange.guard.connectionTimeout was introduced. Note: Please verify on customer system.

3 Tests

Not all defects that got resolved could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.
    To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.
    All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

44082, 44433, 45074, 44007, 43962, 44983,
