2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4077.

52675 Html mail not displayed at all

Some mails were not displayed because <style> tag does not get closed while sanitizing mail's HTML content.

This has been fixed by orderly closing the <style> tag while sanitizing HTML content.

52606 Show hidden files setting does not work at all

Hidden files were not displayed because filter extensions for files were never called.

Invoked filter extension point to post process file list to solve this issue.

52402 Drag and Drop not working with chrome on windows 10 Touch

It was recognized as a touch device and DND was disabled.

This has been solved by adding an additional check.

52348 Logging issue after appsuite update

Open-xchange-osgi didn't contain the latest logback extension.

Defined explicit dependency to newest open-xchange-osgi containing the latest logback extension.

50798 Renaming a root level folder which contains a Favorite Folder will lead to "Mailfolder not found on IMAP Server"

Caused by missing checks if parent folders get renamed or removed.

This has been solved by looking for rename or removal of parent folders.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

52675, 52606, 52402, 52348, 50798,
