2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4426.

52478　Duplicate service instance for singleton service "com.openexchange.session.ObfuscatorService" detected
Accidental duplicate registration for the same service instance.
This has been fixed by removing duplicate service registration.

55284　Possible to change threadSupport if protected
We had no consistently check if threadSupport was enabled.
in case 'threadSupport' is disabled also a potentially active folder viewoption 'thread' is ignored to oslve this issue.

55298　Maximum configured sized needs to be fixed for Japanese Error message
Fixed translation for "Maximum configured sized".

55362　Translation missing on upload timeout error
Added missing translation.

55692　Mobile UI changes layout in jslob
Jslob saves also stores fixed settings that are applied for smartphones only.
This has been fixed by not saving 'layout', 'showContactPictures' and 'showCheckboxes' for mobile devices.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.
To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

52478, 55284, 55298, 55362, 55692,
