23057   No default contact folder for mobile web interface

When logging in the first time, users are forced to define at least one contact folder that shall be used within the mobile web interface. A configuration setting at the backend has been introduced to use customer-defined standard folders as a fallback to avoid additional user interaction. This modification adds a separate configuration file and does not influence with other configuration settings.

4. Changes relevant for Administrators

Changes of Configuration Files

Change #1339 - Added new config parameter for mobile UI

'oxmobile.yml' enhanced by needed configuration sections.

'oxmobile.properties' enhanced by property "mox/config/defaultContactFolder". Default value is "private"

See bug #23057 for more information.

6. Tests

The OX QA team has verified all bug fixes.

To avoid side effects the packages have gone through automated smoke and regression test on both, the OX Build System and a distributed OX QA server setup.

In addition all bug fixes have been checked for potential side effects or changed behavior. Unless explicitly stated with one of the bug entries above, we do not expect other side effects.
