## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4264.

### **54727 OX-Guard HKP modul can not use secure external HKPS servers**

OX Guard does only query DNS records for `_hkp`, not for `_hkps`.

This has been fixed by adding support for `_hkps._tcp` records and improved general DNS handling.

## 3 Changes relevant for Operators

### 3.1 Changes of Configuration Files

#### **Change #4290 Add configuration setting to specify the MAIL FROM used in the SMTP Envelope**

The following Configuration Setting is added

```
# SMTP Server MAIL FROM
```

```
# When sending an email using the guestSMTPServer, Guard  
will use the configured email Address
```

```
# for the MAIL FROM in the SMTP envelope
```

```
# If blank, the senders address will be used
```

```
com.openexchange.guard.guestSMTPMailFrom=
```

This address will be used in the SMTP envelope when sending to/from Guest users

## 4 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

## 5 Fixed Bugs
