1 Shipped Product and Version

Open-Xchange USM 7.4.1-rev12

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #1858.

30521 Some folders did not get synced (i.g. inbox) even after Resync

The error happened when the USM tried to save the sync state for the destination folder after a move operation.

This has been fixed by adding new additional checks to clean up the sync state before saving it if this situation should occur.

3 Tests

Not all issues that got resolved with this Patch Release could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported issue when deploying to a staging or production environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All bug fixes have been checked for potential side effects and changed behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

30521,
