1 Shipped Product and Version

Open-Xchange Frontend6 6.22.6-rev7

2 Bugs Fixed since previous Public Patch Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Release 6.22.6.

31089 Newmail window doest not load properly after update to 6.22.6

The option "Editor toolbar" was only visible in HTML mode and, since the editor toolbar is part of TinyMCE, implemented completely differently from all other options.

This has been fixed by adding a check to the new function to exit when it was called for the option "Editor toolbar".

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All bug fixes have been checked for potential side effects and changed behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
