1 Shipped Product and Version

Open-Xchange AppSuite backend 7.6.0-rev13

Open-Xchange AppSuite frontend 7.6.0-rev10

Open-Xchange USM 7.6.0-rev9

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2095.

30654 Mimetypes set by browser are not reliable

The stored mime type of files was often wrong, which results in no previews being generated. Solution: Primarily rely on MIME type detected by (file) name or subsequently on (file) content.

33626 Tagging a user needs aliases for changeuser-command

When changes happened and defaultsenderaddress or primary_mail was missing inside the alias list, the change command was failing even if the alias list was not in the focus of the current change. This has been fixed by repairing the alias list by providing the primary_mail and defaultsenderaddress exactly like create user does.

33711 Warnings: Early gettext calls

Problem was in window.assert().

Removed the console trace entirely, since in practice, it's much less useful than anticipated and causes the most problems with the amount of logs.

33713 Sorting tasks does not work at all

A variable was not set correctly.

This issue has been fixed.

3 Changes relevant for Administrators

3.1 Changes of Configuration Files

Change #0000 Add missing MIME types to "mime.types" file

Add missing MIME types to "mime.types" file manually to avoid "No preview service ..." error:

```
application/vnd.openxmlformats-officedocument.spreadsheetml.template xltx
application/vnd.openxmlformats-officedocument.presentationml.slideshow ppsx
application/vnd.openxmlformats-officedocument.presentationml.presentation pptx
application/vnd.openxmlformats-officedocument.presentationml.slide sldx
application/vnd.ms-excel.addin.macroEnabled.12 xlam
application/vnd.ms-excel.sheet.binary.macroEnabled.12 xlsb
```

4 Tests

Not all issues that got resolved with this Patch Release could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported issue when deploying to a staging or production environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs

30654, 33626, 33711, 33713,
