1 Shipped Product and Version

Open-Xchange AppSuite frontend 7.6.1-rev15

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2395.

36356 Some mail folders are missing in folder tree

Previous feature enhancements and bugfixes led to a situation where mail folders on certain IMAP hierarchy/configurations could not be displayed anymore. Specifically, this affected setups where folders can be created on the same level as "Inbox" and below "Inbox". Folders below "Inbox" were not shown by the UI anymore in this case. This has been solved by adapting display of folders to the "altnamespace" hierarchy. Folders "below" the Inbox folder are now orderly listed according to their hierarchy while folders on the same level as Inbox are displayed at "My folders".

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
