1 Shipped Product and Version

Open-Xchange AppSuite updater 7.6.1-rev7

Open-Xchange OXtender 2 for Microsoft Outlook 7.2.12

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Release 7.6.1.

34497 Saving an inactive vacation notification twice ends up in an error
In case no mail address for a vacation notice has been selected or provided by the backend, saving that vacation notice is possible at the client but fails due to errors reported by the SIEVE server. This has been solved by not offering a option to save a vacation notice at the client while not having a mail address selected.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
