## 2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Release 7.6.2.

### **36476 Unable to delete appointments from a shared folders**

When trying to delete a appointment within a shared folder, the client intercepts the operation to avoid moving the appointment to the users personal "Trash" folder. A dialog is shown to confirm immediate removal of the appointment. This dialog however used a wrong return value so the appointment could not be removed at all. This has been solved.

## 3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs
