2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2497.

36946 Permissions popup cannot be closed

An User with pim_infostore permissions was not able to close the share window popup and after it was opened the appsuite freezes.

This was fixed so the popup can be dismissed with all user permissions.

37373 Folder list for IMAP subscriptions not present

In some cases, the folder list for IMAP subscriptions (at Settings ->E-Mail) was not correctly shown. This was caused by a dialog-specific issue when loading the root folder and has been solved.

3 Tests

Not all defects that got resolved could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
