2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2539.

32927 Partitial folder recovery mechanism
Partitial folder recovery mechanism wasnt working with an adaption in USM part.
With this fix we introduced the missing adaption to support partitial folder recovery mechanism for Outlook with OXtender2 for Microsoft Outlook.

38598 Outlook delays sync after a while with complex email messages
Complex email messages lead to heavy IMAP utilization during part-wise deep-parse routine.
Solution: Fixed nested message count and pre-load too complex messages to avoid that heavy IMAP utilization.

3 Tests

Not all defects that got resolved could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
