2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #3131.

44433 Guard not displaying cid images in decoded emails. No way to open

After sending an encrypted email from Thunderbird or MacMail with an image in the body of the email there was no way to decode the image in Guard.

Solution: Change search for cid images to pick up thunderbird, MacMail and Parse all multiparts of a message for a content-id attachment and for file attachment by name.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
