2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #3163.

44587 Outlook2016: search does not work

Search in Outlook does not reveal any matching result. The new SearchProtocolHost was using olmapi32.dll instead of msmap32.dll as mapi core dll.

This has been solved by changing the mapi provider to use olmapi32.dll if this was loaded into the calling process.

45184 Mail filter rule can be created without an action

It was possible to save a mail filter rule without entering an action.

This has been fixed by checking for missing entries.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
