## 2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #3213.

### **45348 Cannot move emails to different folders after update to latest 7.6.3**

Email update calls were broken since last update.

This has been fixed by adjusting the previews patch.

### **45078 NPE at c.o.publish.CachingLoader\$PublicationKey**

NullPointerException if an user tried to download a publication from a link.

This has been solved by adding a nullguard.

### **40471 Single contact will be sent as ISO-8859-1, but content type UTF-8**

Fallback to the default Java charset were used when writing/reading VCards.

This has been fixed by enforcing UTF-8 charset when writing/reading VCards.

### **45306 Unable to add twitter account**

Security issue from an other bug renders double-deferring of call-back URLs to result in an error.

Solution: Proper registration of URLs for OAuth provider call-backs.

### **42633 Updatetask MigrateAliasUpdateTask fails due to Duplicate entry in user\_alias table**

The insert operations fails if either two duplicate entries exists within the user\_attribute table or if an entry with the same cid, userid and alias already exists within the user\_alias table.

This has been fixed by replacing already existing entries in user\_alias table. Since they are equal no aliases get lost.

## 3 Tests

Not all defects that got resolved could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs
