2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #3879.

50016 When composing an email, the signatures do not get refreshed, when adding initial/new one

This has been fixed by using standard listener.

50041 Moving files with description to external storage not working

Missing translations were added.

50258 Categories - select all in one of the tabs - info message that not all mails are selected is missing

Missing translations were added.

50674 Deleting 2 Users at a time via SOAP results in a database deadlock

Possible database deadlock on concurrent delete attempts for users in the same context.
Solution: Acquire a lock on user deletion to enforce enqueueing of concurrent delete calls.

50714 OXtender synchronization fails with Couldn't determine extra fields in object with errors

The ical analysis of an external invitation delivers an json object "users" without sub fields, especially without confirmation. This was unexpected by USM and produced an error, which led to a general sync error with OLOX.

Now the missing confirmation is accepted and initialized by USM with 0.

50798 Renaming a root level folder which contains a Favorite Folder will lead to "Mailfolder not found on IMAP Server"

Missing checks if parent folders get renamed or removed.

This has been solved by looking for rename or removal of parent folders. On rename: anticipate changed path and keep folder. On remove: immediately remove affected favorites. This doesn't work if triggered by another client.

50837 Birthday on 1.1.1970 not displayed

Timestamp for 1.1.1970 were interpreted as timestamp 0.
Adjusted calculation from Birth Dates to solve this issue.

50965 Restore compose application pop up not loading with 7.8.3 upgrade

Introduced new value for ox.serverConfig.persistence: "always". Only works with adjustment in custom bundles.

50982 External Cloud Storage: number of Items in folder not displayed - '0' all the time

Some file storage implementations are not returning a file count.

With this fix the filecount isn't displayed if the external storage returns no value for file count.

50987 AutoStart is not working with io.ox/settings or portal

Settings is not a favorite app and is therefore ignored as autolaunch.

This has been solved by adding a special case for settings. Settings will not appear in the dropdown but can be set by the provider as default autoStart app.

50991 Exception generating imap URI

A possible scheme/port information in "com.openexchange.mail.mailServer" or

"com.openexchange.mail.transportServer" property was not properly handled.

This has been solved by using a structured object for the global mail/transport server configuration setting to also apply protocol, port, etc. (if specified).

50997 Searching inside of sent mail folder always shows senders name in results column

This has been solved by adding special handling in find app.

51017 Munin error updating last-error in ox_grizzly_TCPNIOTransport

Last error value was not a simple signed integer.

Check for "N/A", will return 0 instead of "N/A" with this fix and will only fix the problem for ox_grizzly_TCPNIOTransport.

51018 Munin warning updating config ox.java_heap

Non-existing mbean raised an error.

This has been fixed by removing mbean.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

50016, 50041, 50258, 50674, 50714, 50798, 50837, 50965, 50982, 50987, 50991, 50997, 51017, 51018,
