## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4083.

### **52633 Drag & drop of a huge picture into a HTML-Mail will cause the JVM to OOM/ up until OS swapped**

Configured image limitations were not tested when checking for validity of an uploaded image. This has been solved by testing for image limitations when checking for validity of an uploaded image.

### **52928 Attachment not shown**

In email with attachments which have different cid and id it was not possible to show all attachments.

Make sure attachments do not have a cid attribute when added to a collection to solve this issue.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs
