

Release Notes for Patch Release #4669

2018-04-23

Security Patch Release

This Patch Release addresses critical vulnerabilities; please consider deploying it as soon as possible. Not deploying this Patch Release may result in remote service exploitation, security threats to users and exposure of sensitive data.

Detailed vulnerability descriptions will be publicly disclosed no earlier than five (5) working days after public availability of this Patch Release. There is no indication that one or more of these vulnerabilities are already getting exploited or that information about them is publicly circulating.

3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4554.

57644 HALO View complete blank

Added missing email1 parameter to halo click handler to solve this issue.

57168 Mail shows only blank body

Depth was not incremented, when style tag in html-body was added.

This has been fixed by incrementing depth when adding CSS on style tag.

55362 Translation missing on upload timeout error

Error to early to load at least the translated message.

Static error messages for different languages are now added to index.html to solve this issue.

4 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.
