

## Release Notes

### Public Patch Release 1292 (2013-01-28)

#### 1. Origin Product/Version

Open-Xchange Server 6 backend 6.22.1-rev10  
Open-Xchange Server 6 frontend 6.22.1-rev7  
Open-Xchange Server 6 usm 6.22.1-rev6

#### 2. Packages shipped with this Patch Release

Open-Xchange Server 6 backend 6.22.1-rev12  
Open-Xchange Server 6 frontend 6.22.1-rev8  
Open-Xchange Server 6 usm 6.22.1-rev7

#### 3. Bugs fixed with this Patch Release

- 24519 Embedded Picture automatically removed while forwarding an email  
When forwarding certain HTML E-mails with embedded images, the image was incorrectly referenced in some cases. This has been fixed.
- 24395 Wrong sender name used when sending mails with OLOX2  
When changing a users display- first- or lastname, the original name was used for the E-Mail sender information when using Outlook. This has been solved by providing the required information to the client.
- 24139 Configjump not working  
After updating to 6.22.1, the "Extras" link at the UI "Configuration" section vanished. This has been fixed.
- 23994 Google calendar refresh not working  
The UI implementation for refreshing remote calendar data has been adapted to a different API handling. Now the backend also honors this.
- 23985 SMS auto completion is not working  
Auto-completing the recipient address at custom SMS communication plugins did not work correctly when using contacts that just contain phone numbers. This has been fixed.

23882 "Read" flag did not get synchronized for public mail folders with "Irs" rights

While browsing shared IMAP folders with certain access permissions using Outlook, mails get re-set to "unread". This has been solved by providing appropriate information through the USM interface.

23778 Google Calendar subscription fails

Due to an API change at Google, several changes have been implemented to access Google Calendar information again.

23251 Datamining tool is missing from release

With 6.22.1, the "datamining" tool was missing among the shipped packages. This has been solved by putting the tool and all libraries to a separate package "open-xchange-datamining".

15864 E-Mail Attachments disappearing when forwarding a message

Image attachment are attached to a message although the associated MIME part provides a Content-ID header. However, that header's value is not referenced at all in associated mail text. Therefore treated as a regular image file attachment. This has been fixed.

### **Changes of Configuration Files**

- none -

### **Changes of Database Schemes**

- none -

### **Changes of Command Line Tools**

- none -

### **Changes of Behavior**

- none -

### **Changes of Packaging**

The package "open-xchange-datamining" now contains all required files and libraries to analyze data for a given system.

### **Changes of Front-End Customizations**

- none -

## 4. Changes relevant for Developers

### Changes of the HTTP API

- none -

### Changes of the RMI API

- none -

### Changes of the SOAP API

- none -

### Changes of the WebDAV API

- none -

### Changes of the GUI-API

- none -

## 5. Tests

The OX QA team has verified all bug fixes.

To avoid side effects the packages have gone through automated smoke and regression test on both, the OX Build System and a distributed OX QA server setup.

In addition all bug fixes have been checked for potential side effects or changed behavior. Unless explicitly stated with one of the bug entries above, we do not expect other side effects.

## 6. Fixed bugs

24519, 24395, 24139, 23994, 23985, 23882, 23778, 23251, 15864
