

Release Notes

Public Patch Release 1272 (2013-01-16)

1. Origin Product/Version

OXTender 2 for Microsoft Outlook 7.0.58
OXUpdater 6.18.14

2. Packages shipped with this Patch Release

OXTender 2 for Microsoft Outlook 7.0.60
OXUpdater 6.18.16

3. Bugs fixed with this Patch Release

- 24424 Outlook mail folder copy does not work from OX account to local PST
Moving mail folders from a local PST to a OX enabled storage, an error message has been shown and the move did not succeed. This has been fixed.
- 23956 Unable to install OXTender via Updater with proxy turned on
When using a proxy server between the client and the OX server, installing updates did not work. Another issue surfaced regarding the handling of SSL and authentication capable proxy servers. This has been solved at the OXUpdater component.
- 23464 Error message remain in background-idle
Entering very long Outlook profile names at the OXTender installation process led to an error message, which did not get the focus and therefor was not visible to the user at once. This has been solved by truncating the profile name to 63 characters if the supplied name exceeds the limit.
- 23456 "Mail not read" messages when unsubscribing folders
Subscribing and unsubscribing shared mail folders did cause read-receipt mails to return "Mail has not been read" messages to the original sender. This has been fixed.
- 23166 Problem with "on behalf of"
If the mails SENDER and FROM fields of a mail are both set to the same value, Outlook displayed incorrect "on behalf of" information. This has been solved by not triggering "on behalf of" information at Outlook if both headers are equal.

23074 Outlook contact stays in Outbox

When forwarding a contact via mail at Outlook while having native Outlook mail format (MSTNEF) configured, that mail did get stuck at the Outbox folder. This has been fixed by converting this kind of mails to a proper format.

22642 Error "new UUID already mapped by server"

A recurring appointment, where the recurrence pattern had been modified several times at the OX server, caused Outlook to display a synchronization error message. This has been solved by properly setting recurrence information.

20116 Free/Busy information not correctly shown in Outlook

When checking availability in Outlook, appointments marked as "free" have been shown as "busy". This is solved at the client with this release. Note that the server-side fix of this requires a 7.0.1 backend.

Changes of Configuration Files

- none -

Changes of Database Schemes

- none -

Changes of Command Line Tools

- none -

Changes of Behavior

- none -

Changes of Packaging

- none -

Changes of Front-End Customizations

- none -

4. Changes relevant for Developers

Changes of the HTTP API

- none -

Changes of the RMI API

- none -

Changes of the SOAP API

- none -

Changes of the WebDAV API

- none -

Changes of the GUI-API

- none -

5. Tests

The OX QA team has verified all bug fixes.

To avoid side effects the packages have gone through automated smoke and regression test on both, the OX Build System and a distributed OX QA server setup.

In addition all bug fixes have been checked for potential side effects or changed behavior. Unless explicitly stated with one of the bug entries above, we do not expect other side effects.

6. Fixed bugs

24424, 23956, 23464, 23456, 23166, 23074, 22642, 20116
