## 2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.6.5. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

### **PLG-294** Double get parameter in url for the reset password application

Status: Fixed

Root Cause Description:

Wrong URL encoding for '%' character led to URL token being filtered out immediately.

Solution Description:

Use the configuration from as-config directly, without going through the DOM.

Severity: 3

Components: alternative-login-screen

Labels: I3

Affected Packages: open-xchange-appsuite-alternative-login-screen

## 3 Changes relevant for Operators

### 3.1 Changes of Configuration Files

#### Change #1 /opt/open-xchange/etc/settings/mx-checker.properties

```
+io.ox/mx-checker//ignoreEmptyActionUrl = false
```

Package: open-xchange-appsuite-mx-checker

### 3.2 Changes of Behavior

**Change #PLG-293 Add ability to show mx checker banner without url**

Status: Done  
Resolution: Fixed  
Components: mx-checker (ui)  
Affected Packages: open-xchange-appsuite-mx-checker

## 4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 5 Fixed Bugs
