1 Shipped Product and Version

OX App Suite Engineering Services Plugins 1.6.5-rev4

Find more information about product versions and releases at http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning_and_Numbering and <http://documentation.open-xchange.com/>.

2 Breaking Changes

Warning

This delivery is affected by changes which potentially require manual interactions at update time. Please read this section carefully before updating and follow the guidance. We highly recommend to prepare the update on a staging or test system in advance.

2.1 SMS Twilio Plugin Configuration Changes

The `open-xchange-sms-twilio` package configuration will be changed by fix the PLG-234 again. This is needed to ensure that secret information will be excluded from the OX support tarball. Those changes will be applied automatically to the configuration file and we also fixed this mechanism for RPM based target distributions with this delivery.

Configuration File: `/opt/open-xchange/etc/twilio.properties`

- new: `com.openexchange.plugins.sms.twilio.accountSID.secret=ACCOUNT_SID`
old (before v1.6.5): `com.openexchange.plugins.sms.twilio.accountSID=ACCOUNT_SID`
old (with v1.6.5): `com.openexchange.plugins.sms.twilio.secret.accountSID=ACCOUNT_SID`
- new: `com.openexchange.plugins.sms.twilio.authtoken.secret=AUTH_TOKEN`
old (before v1.6.5): `com.openexchange.plugins.sms.twilio.authtoken=AUTH_TOKEN`
old (with v1.6.5): `com.openexchange.plugins.sms.twilio.secret.authtoken=AUTH_TOKEN`
- new: `com.openexchange.plugins.sms.twilio.messageservicesid.secret=SERVICE_SID`
old (before v1.6.5): `com.openexchange.plugins.sms.twilio.messageservicesid=SERVICE_SID`
old (with v1.6.5): `com.openexchange.plugins.sms.twilio.secret.messageservicesid=SERVICE_SID`

Warning

If you are using [ConfigCascade](#) to change the behaviour on brand, context or user level, you have to take manual actions via SOAP API or command line tools like e.g.:

```
changeuser or changecontext [...] \  
--config/com.openexchange.plugins.sms.twilio.accountSID.secret=ACCOUNT_SID \  
--config/com.openexchange.plugins.sms.twilio.authtoken.secret=AUTH_TOKEN \  
--config/com.openexchange.plugins.sms.twilio.messageservicesid.secret=SERVICE_SID \  
--remove-config/com.openexchange.plugins.sms.twilio.accountSID \  
--remove-config/com.openexchange.plugins.sms.twilio.secret.accountSID \  
--remove-config/com.openexchange.plugins.sms.twilio.authtoken \  
--remove-config/com.openexchange.plugins.sms.twilio.secret.accountSID \  
--remove-config/com.openexchange.plugins.sms.twilio.messageservicesid \  
--remove-config/com.openexchange.plugins.sms.twilio.secret.messageservicesid
```

3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.6.5.

PLG-277 Dumpster Plugin not showing Date

The [column 661](#) was missing when requesting list of mails to recover. This has been added now in

the api call.

PLG-276 Dumpster item in trash context menu uses data-action already used by core

The wrong data-action name has been rename to a unique value.

PLG-273 Problem with survey hasSeen if not en_US

When checking for the presence of settings, 0 was interpreted as falsy and therefore not present. Now we explicitly check for the value null which is returned when a settings value is not present.

PLG-272 Fix survey example configuration

The `hasSeen` settings was missing and also quotation marks are done incorrectly inside the example config. And the check of missing user configuration was not correctly handled.

This has been fixed by adjusting the example settings in `survey.properties`.

PLG-271 Add missing survey static package

The `open-xchange-appsuite-survey-static` package was missing for a `ox_logo_blue.svg`. We introduced now the missing static package, but it will not be installed automatically.

PLG-239 Configuration `io-ox-appcontrol-dropdown-links.properties` is not marked as debian conffile

This was caused by a type in the file name.

We fixed now the mistaken packaging file name.

PLG-234 Rename twillo config settings and fix postinstall scripts

The previous fix PLG-73 caused a regression by an error in a rpm postinstall script. Furthermore not all secret details got removed from a OX support tarball.

We now renamed the affected config settings again and fixed the postinstall script.

4 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs

PLG-277, PLG-276, PLG-273, PLG-272, PLG-271, PLG-239, PLG-234,
