2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.6.4. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

PLG-199 Mandatory wizard: old pictures are used in wizard

Warning

The top bar images can be only aligned to a specific core UI version. Since plugins supports multiple core versions we aligned those images only for the most recent version and introduced lower dependency limits to avoid unintended changes in the field. Please check the documentation of older versions to identify the supported release for this package.

4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.
