2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 7.10.5. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

UNI-48 Add switch to disable ldap-auth

Status: Done

Root Cause Description:

No switch to disable AuthenticationService from authentication-ucs.

Solution Description:

Add property com.openexchange.authentication.ucs.auth.enabled to disable Authentication-Service.

Resolution: Verified

Severity: 3

Components: AppSuite Middleware Customization

Verified with Builds: univention-7.10.5-rev2

Labels: L3

Affected Packages: open-xchange-authentication-ucs
open-xchange-authentication-ucs-common

3 Changes relevant for Operators

3.1 Changes of Configuration Files

Change #1 /opt/open-xchange/etc/authplugin.properties

```
+com.openexchange.authentication.ucs.auth.enabled=true
```

Package: open-xchange-authentication-ucs-common

4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs
