## 1 Shipped Product and Version

Open-Xchange Cloud Plugins 1.8.1-rev4

Find more information about product versions and releases at [http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning\\_and\\_Numbering](http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning_and_Numbering) and <http://documentation.open-xchange.com/>.

## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.8.1.

### **CP-114 Cassandra recordLogin not working**

The ox namespace key was hardcoded on a Cassandra object model class, which overrides the configuration value `com.openexchange.cloudplugins.cassandraKeyspace` from `cloudplugins-cassandra.properties`.

This has been solved by removing the hardcoded namespace key and only use the configuration property to determine the Cassandra keyspace to use.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

CP-114,
