2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.11.8-rev3.

CP-348 ICPKeycloakOAuthAccessTokenService.addParametersToSession throws NPE when passing a null OAuthAccessToken

The ICPKeycloakOAuthAccessTokenService interface static method addParametersToSession parameter accessToken was changed from Nullable to NonNull and the null check was removed. This can lead to a NullPointerException when a previously implemented caller passes a null accessToken.

Make accessToken Nullable again and add the null check back.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

CP-348,
