1 Shipped Product and Version

Open-Xchange AppSuite frontend 7.4.2-rev9

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #1896.

30920 Server setting `com.openexchange.mail.ignoreSubscription=true` has no influence on App Suite UI

The parameter `com.openexchange.mail.ignoreSubscription` was not available for AppSuite UI.
This has been fixed by changing an api call.

31085 Drive is translated to Disk in NL locale

The "product" Drive was translated to Disk within the webfrontend.
Now the product has the correct names for all languages.

31138 Polish term for "Inbox" (skrzynka odbiorcza) not displayed completely

We cutted the name at 15 chars.
This has been fixed by raising the limit to 20 chars.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All bug fixes have been checked for potential side effects and changed behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

30920, 31085, 31138,
