

OX AppSuite Frontend Release Notes for Patch Release #1929

March 24, 2014

Security Patch Release

This Patch Release addresses critical vulnerabilities; please consider deploying it as soon as possible. Not deploying this Patch Release may result in remote service exploitation, security threats to users and exposure of sensitive data.

Detailed vulnerability descriptions will be publicly disclosed no earlier than five (5) working days after public availability of this Patch Release. There is no indication that one or more of these vulnerabilities are already getting exploited or that information about them is publicly circulating.

1 Shipped Product and Version

Open-Xchange AppSuite frontend 7.2.2-rev20

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #1619.

31343 CVE-2014-2392

CVSSv2: 3.3

31342 CVE-2014-2391

CVSSv2: 3.3

30588 Entire conversation will be marked as unread if you mark a single message as unread

Entire conversation was marked as unread after selecting a single message
This has been fixed by only rendering threads in vgrid in thread view.

30586 Entire conversation will be marked as read when selecting a single message

Entire conversation was marked as read after selecting a single message
This has been fixed by only rendering threads in vgrid in thread view.

30436 Print option available while selecting two distribution lists

A useless Print option was displayed when selecting two distribution lists
Now print action is only be shown if at least one contact is part of the selection.

30431 UNREAD styling does not change in expanded conversation view

Styling of the message mark as unread does not change
This has been fixed by refreshing thread summary on APIs "refresh.list" event.

30388 Calendar error seen in App Suite logs for each UI reload action for users with disabled calendar module

In appsuite logs the error No permission for module: calendar. was displayed after reloading/refreshing the AppSuite UI. This has been fixed by adding capability check

30381 Expanded conversation view is not removed when sorting by date

Conversation thread was still expanded after toggle the view to Date order
This has been fixed by closing all open threads when sort property is changed, so they wont be rendered in non-threaded views.

30322 "UUU" like chars instead of "... " cut off marker in the E-Mail

overview if the subject is very long

The subject had displayed broken UUU like characters as cut off marker. This has been fixed by changing markup to prevent issues with font awesome in combination with text-overflow ellipsis.

30298 Conversations - There's an option to mark the Entire thread as "Read" - but there's no option to mark as "Unread"

In a thread change from read/unread the dropdown was not updated. Solution is that now whenever the status of a message is changed in a thread the dropdown is updated.

30243 "Flag" section pops up when clicking outside a mail

When clicking the outside border of a very small mail, the "Flags" section pops up. This has been fixed by correctly setting the interactive area for the "flags" section.

30008 Sending E-Mails do not update the folder view of "Send objects" or "Drafts" instantly

Draft folder and "Send objects" have not been updated because of a broken typo. Fixed typo, but note: "Instantly" is 3 seconds, otherwise UI is too fast and doesn't get the new items.

29831 Missing extension point to hide multiple attachment upload at mail

Certain browsers have trouble correctly managing multiple file uploads. To work around this, an extension point has been implemented at the core frontend and a custom plugin to deny multiple file uploads.

29733 Plain-text preview removes line breaks

Previewing plain-text attachments did not maintain any line breaks of the attachment. This has been fixed by correctly sanitizing the attachments content.

29704 Task print view shows incorrect time information

Print view of tasks did not take the timezone offset for start/end date or reminders into account. This has been fixed by applying the timezone offset to any time values shown in print view for tasks.

29677 Folder name within a context menu does not update when renaming

When renaming a folder, the context menu did still show the previous folder name. This has been solved by correctly updating the context menu after renaming the folder.

29673 Empty popup remains when closing task recurrence setting

When selecting a recurrence pattern for tasks, a small section of the corresponding popup remained after closing it. This has been solved by entirely removing the popup when closing it.

29597 Different contact field sorting in edit and detail view

Some communication related information was shown in different order for the edit and the detail view. This has been unified and both views now show the same order.

29492 Incorrect folder sort order with Safari

Based on a browser bug, the Safari browser did present a different sort order of folders than other browsers. This has been solved by removing a client-side sorting of folders and relying on the order that's given by the backend.

29281 Every manual save operation on mail creates a new draft mail

When manually saving a mail as draft, a new copy has been created each time. This has been solved by updating the previously saved draft mail rather than creating a new one.

29271 Contacts view panel contains out-dated data when switching to an empty folder

When selecting a contact and switching to an empty contact folder, the previously selected contact data was still shown in some cases. This has been fixed by updating the detail section when entering empty folders as well.

29086 Restoring applications only works for mail

Works now for all apps except distribution lists.

29085 Animation of the "Refresh" icon sometimes triggered seconds later

Same as bug #28755.

28776 Remove headline "Private" shown in the folder list of the address book when no public or shared folders are available

Applied for all apps/foldertrees, not only "contacts".

28775 Refresh circle does not react when clicked

The refresh circle is now stopped correctly.

28756 Incorrect sorting of tasks on refresh

When creating tasks, their sort order has not been automatically applied to the configured order. This has been solved.

28705 Mail folder with a dot in its name breaks the mail app

When dealing with mail folders that may contain a dot character, the mail app suffered a loss of functionality and did freeze in a reproducible way. This has been solved by honouring dots as valid folder name elements.

28558 Folder name at the footer does not update when navigating between modules

When switching modules, the current folder name did not update. This has been fixed by reloading the folder name at this place when switching modules, not just when switching folders.

28042 Amount of contacts and tasks not indicated by the footer bar

While other modules did show the amount of items within the current folder at its footer bar, this information was missing for contacts and task folders. This has been solved.

27692 Hide the folder option "Add public folder" when public folder access has been disabled

Now checking for capability "edit_public_folders".

27635 Distribution lists cannot be imported as vcard file from E-Mails

Importing distribution lists that got sent as vCard file (e.g. attached to an E-Mail), could not be imported to the users contacts folder. This has been solved by correctly converting such vCard files and using the correct dialog for saving them.

27542 "Select all" mail checkbox feature does not work for un-choosing after email search results into a single mail

Problem was a simple boundary calculation error, which "deactivates" the "select all" checkbox if the list contains 0 or 1 element. Of course, the checkbox should only be deactivated, when the list is empty.

27136 Position of mini calendar is not exactly below the date field in create appointment window of Calendar

Add new position calculation function for date picker in relation to the input element.

27073 "Create" button continuous click creates tasks multiple times

Once hitting "Save", the app window changes state to "busy". All controls are disabled, so user cannot click any controls twice.

26712 Draft mail does not get deleted automatically when draft is finished and sent

Sendtype from draft mails was set wrong This has been fixed by correctly setting the sendtype for an edited draft mail and adding deleteDraftOnTransport = true as an url parameter.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All bug fixes have been checked for potential side effects and changed behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

31343, 31342, 30588, 30586, 30436, 30431, 30388, 30381, 30322, 30298,
30243, 30008, 29831, 29733, 29704, 29677, 29673, 29597, 29492, 29281,
29271, 29086, 29085, 28776, 28775, 28756, 28705, 28558, 28042, 27692,
27635, 27542, 27136, 27073, 26712,
