1 Shipped Product and Version

Open-Xchange AppSuite backend 7.4.2-rev16

Open-Xchange USM 7.4.2-rev9

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #1920.

30521 Some folders did not get synced (i.g. inbox) even after Resync

Security check when storing SyncState in DB was too restrictive.

This has been fixed by enforcing correct parent folder ID instead of only verifying the parent-folder-ID.

30848 Displaying S/MIME encrypted mails are empty

The mail in question was not detected to be an S/MIME encrypted mail. Thus its JSON representation transferred to Outlook connector was wrong. Solution: Properly recognize & transfer such an S/MIME encrypted mail.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All bug fixes have been checked for potential side effects and changed behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

30521, 30848,
