## 1 Shipped Product and Version

Open-Xchange AppSuite frontend 7.6.1-rev10

## 2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2302.

### **35862 Vacation Calendar only up to 2014**

It was not possible to select a year in the future with the datepicker.

This has been fixed by adding two new options to the date picker: future and past (both positive integers; future defaults to 0, past defaults to 150). Vacation notice now uses future=5 and past=5.

## 3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

35862,
