2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2562.

39475 OX Updater packages for OX Drive for Windows do not contain binaries

Due to a build error, the latest Public Patch release contained a `open-xchange-updater-drive` package without binaries. This patch is a rebuild of rev14, based on a fixed build system and contains no new OXtender version.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

39475,
