2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2985.

33815 Drop down list closes immediately on mouse down when selecting from auto complete list

The autocompletebox closes immediately on mouse down and participant is not added. Now box closes on mouse up and selected name is added as participant.

41894 OXUpdater fails to download new OXUpdater package

The product name led to names of binary files which need proper URL encoding in download URLs. The lack of that encoding leads to broken download URLs. This was fixed by always applying proper encoding when compiling URLs for update.xml.

42322 Frontend does not check for exceeding file size for mail attachments

Added check for exceeding file size.

42880 "Image transformation denied. Resolution is too high." message missing after update

Changing the behavior to respond with a 406 HTTP error code in case image transformation has been denied, accidentally removed the logging. This has been fixed by re-introducing proper logging for possible exceptions of type ImageTransformationDeniedIOException.

42898 Stopping a JVM produces com.openexchange.push.mail.notify.MailNotifyPushUdpSocketListener related messages in OX Log

Missed to orderly leave the socket listening routine if shut-down.
Solution: Properly mark UDP socket listener as stopped on bundle shut-down.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

33815, 41894, 42322, 42880, 42898,
