2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2952.

42202 Add more verbose logging for images that gets refused to be processed
Exception message did not include the actual resolution or total size of the image that was rejected being transformed.
This has been fixed by appending total size/current resolution to exception message (if known).

42880 "Image transformation denied. Resolution is too high." message missing after update
Changing the behavior to respond with a 406 HTTP error code in case image transformation has been denied, accidentially removed the logging.
This has been fixed by re-introducing proper logging for possible exceptions of type ImageTransformationDeniedIOException.

42898 Stopping a JVM produces com.openexchange.push.mail.notify.MailNotifyPushUdpSocketListener related messages in OX Log
Missed to orderly leave the socket listening routine if shut-down.
Solution: Properly mark UDP socket listener as stopped on bundle shut-down.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

42202, 42880, 42898,
