## 2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #3072.

### **43028 Reload /re-login is necessary to access your external mailbox after password change**

After changing the userpassword a reload was needed to display an external emailaccount. Now the folder tree gets refreshed after a password change.

### **43327 Drafts not displayed correctly after auto-save**

Drafts folder was not instantly reloaded and every draft mail gets a new ID. This has been fixed by reloading drafts folder on auto-save and save-as-draft.

### **43836 Distribution list with 1 letter within the local part of the email not working**

Less or equal in check should only be less.  
Fixed in bootstrap-tokenfield lib.

## 3 Tests

Not all defects that got resolved could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

43028, 43327, 43836,
