2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #3245.

45396 Guard keyserver response to search for existing key with upto 5 times the same key-pair

Same keys were listed multiple times, this was caused by duplicates in result set. This has been solved by removing duplicate entries from the result set.

45491 No way to disable SMTP auth when sending through SMTP server

Authentication was used regardless of username settings. With this fix the authentication is not used if username is blank.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

45396, 45491,
