2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4257.

54723 Busy circle never stops on attachment uploads
Tried to create previews for documents for local files.
This has been solved by not trying to create previews for documents for local files.

54593 No error message if import limit is reached
No warning given in case number of imported items were truncated.
This has been fixed by adding warning if number of imported objects were truncated.

54529 Drive mail drive attachment counting filesize against upload limit
Any mail attachment appended to the new message has been checked against upload quota limitation.
Only consider uploaded file (mail attachments) when checking upload quota limitation to solve this issue.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.
To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

54723, 54593, 54529,
