2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4555.

57023 "Show done tasks" resets after logout and login

Missing handling to store grid options.

This has been fixed by adding handling for all options (sort, order, done).

56965 Distribution list - adding an external user with just clicking save is not working

Missing blur handler.

This has been solved by introducing blur handler on typeahead field.

56924 Forward Email in some mails attachment get lost

Wrong mail part id for the text part.

This has been solved by adjusting part in case "nature" is set to "virtual".

56875 Eml Import via Drag&Drop not working with Unified Mailbox

Eml import were available for unified inbox but not working.

Now importing for unified mail folder is disabled.

56795 Month view - appointments in weeks 13, 22, 31, 39, 40 48 get not displayed

Week collection of last week in month was overwritten, instead of reused, when new weeks were required.

Reuse already existing week collections to solve this issue.

56774 Usercopy of user with userfilestore fails with generic error message

Look-up whether destination user should use Unified Quota although not yet completely available.

Now deny copying a user using Unified Quota and avoid checking for it during user-copy operation.

56638 Cloud storage - error messages after moving of a larger folder / larger number of files between different storages

Heart-beat kicks-in too late.

This has been solved by letting heart-beat kick-in early enough.

56342 Show and hide name while mail compose

Default account "displayname" is used in from dropdown but initially set in a jslob setting once you've started to add a custom displayname.

This has been fixed by storing current account "displayname" right from the start and keep in updated every time a instance of mail compose is created.

55044 OXTender for Outlook destroys SMIME signature

Empty lines are discarded when parsing multipart content.

Keep possible preceding new-lines at the start of a multipart content to not destroy SMIME signature.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

57023, 56965, 56924, 56875, 56795, 56774, 56638, 56342, 55044,
