## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4582.

### **56806 Google drive cannot be added after adding an external Drive account and gmail oath account**

The link checked only if a google account were added, but not if this account was an gmail or an Google-Drive account.

Now it is checked for both individual.

### **54765 Guest quota not working as expected**

Guest quota was not working as expected.

This has been solved by removing frontend quota check.

### **52107 Different display of name with comma**

Parentheses were rigorously dropped from address strings.

Solution: Keep parentheses in quoted personal part; e.g. `'"Doe, Jane (JD)" <doe.jane@domain.de>'`.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs
