## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4881.

### **60380 Address book sort order is different based on the number of contacts**

Sortname was the same with multiple contacts, so no clear sorting order. This has been fixed by adding the first valid mail address as second sorting criteria, if sortnames are the same.

### **58895 Contacts with Email 2 field in distribution list do not populate**

No filtering and yells for those emails. This has been solved by adding yells and filtering.

### **60415 Context menu is not displayed for attachment**

Race condition caused the ul element reference to be missing. This has been fixed by using a safer way to store the ul element reference.

### **60751 Firefox / IE / Edge on Windows: Mail App with Mail in INBOX blocks WebUI when opening Settings Burger Menu**

Second body node in dom causes problems when used without iframe. Appsuite 7.8.4 has extended backend sanitizing, where body nodes are replaced with divs. With this, another body node to preserve inline styles is not needed.

### **55887 Not able to pick 2nd or 3rd mail address via contact picker**

Missing data about mail address field. Addressbook popup returns field-value is used to initialize participant model.

### **60718 Strange error message when Quota is exceeded**

Simplified the message. Message is not translated in every language yet.

### **60277 Vcard gets attached multiple times**

Wrong vCard file name representations are compared. This has been solved by checking proper vCard file name representations.

## 3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

60380, 58895, 60415, 60751, 55887, 60718, 60277,
