2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4917.

60939 OXExceptions related to USER_INPUT are logged but setting is suppressed

Orderly suppressing stack trace for OXExceptions with a category listed by "com.openexchange.log.suppressedCategories" property to solve this issue.

60909 com.openexchange.smtp.smtpLocalhost is by default null

Changed interpretation of the default value for "com.openexchange.smtp.smtpLocalhost" property. This has been solved by restoring proper interpretation of the default value for "com.openexchange.smtp.smtpLocalhost" property.

60874 OXUserServicePortType.change(Change ch) method is not backward compatible

Naming changed from "drive_folder_mode" to "drive_user_folder_mode".
Solution: Accept & output alternative "drive_folder_mode" element for passing "drive_user_folder_mode"

60828 Segmented updates doesn't work with multiple domains

The feature has been designed to only serve one migrationRedirect URL. This has been solved by adding the possibility to configure the migrationRedirectURL on a per-host base via the as-config.yml

60826 Sharing is not fully capable to deal with "segmented updates"

The LOCATED_IN_ANOTHER_SERVER exception was not properly handled in the ShareServlet. This has been fixed by handling the exception properly, i.e. redirect the client to the appropriate node. Introduced a new migrationRedirectURL property for the ShareServlet to use in order to send a redirect to the correct node.

60698 Contact list selected, contacts get deselected when clicking on group header

No differentiation between keyboard "clicks" and touch/mouse "clicks".
Support autoselect only for keyboard navigation to solve this.

60457 Search intermittently displays no folder information with results

Increase robustness for mail by using loader information directly instead of a derived property value. Now the folder is always displayed in a search result.

59723 Message "Error Sequence number is outdated." is not specific to end-users

Changed Error message to "This appointment already exists in your calendar." and added translations.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both,

a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

60939, 60909, 60874, 60828, 60826, 60698, 60457, 59723,
