2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5074.

62106 Not possible to create appointment in Thunderbird after update

Due to a change from latest 7.8.4 patch (#5074), it was not possible to create an appointment with Thunderbird.

This has been solved by reverting the fix to have a working Thunderbird integration again. A new fix for the other bug (#62106, not possible to import big ical files) will be provided later with another patch.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

62106,
