2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5339.

66396 Move context to another filestore using movecontextfilestore is not updating new filestoreID

Trying to delete location/directory from source file storage failed. Due to that, context information has not been properly updated.

Solved by fail-safe deletion of source location in file storage. Note: Filestore identifier of affected contexts need to be manually adjusted in database.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
