2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5742.

OXUIB-260 Gdpr export page does not refresh once the download is ready

This was caused by a missing update event.
This has been solved by triggering event to update the view.

OXUIB-252 Same email search results in different options

When 'search' collection get's expired via expire() the 'expire' property got reverted immediately.
This has been solved by manipulating 'expired' property directly.

OXUIB-251 Optional fields gone from contacts

The user fields 1 to 20 were not provided in the Edit dialog.
The user fields 1 to 20 have been added to the Edit dialog to solve this issue.

OXUIB-246 Reply-To field isn't working at all

Missing support for "reply_to" field in new mail compose implementation.
This has been fixed by adding support for "reply_to" field in new mail compose implementation.

OXUIB-183 Found no such composition space

There is a little time gap between the POST /compose/:id/attachment to state to have a progress of 100% and the fact, that the upload call resolves. This is the time, the server needs to finally store the attachment somewhere. If the mail is send in exactly this gap, a race condition between sending and attaching the image to the mail might occur.
Wait until the attachment-upload has been resolved before the mail send process can be started is solving this issue.

MWB-328 Data export logic for unsubscribed mail folders is inverted

Misinterpreted "includeUnsubscribed" boolean flag on mail data export.
Solution: Properly interpret "includeUnsubscribed" boolean flag on mail data export.

MWB-323 "set" in sieve rule: mailfilter page not loading

Action command parser was missing.
This has been solved by adding action command parser for set action.

MWB-311 Possible memory leak in middleware

Internal cache in IMAP bundle used to held in-memory structure of IMAP server's LIST/LSUB output steadily fills up over several months as long as enough active session are present. Moreover, accumulation of unused/stale IMAP store containers managed in IMAP connection cache also due to vast number of active sessions.
Let cached entries expire (and remove from cache) after reasonable amount of idle time as well as drop unused/stale IMAP store containers managed in IMAP connection cache to solve this issue.

MWB-282 Sharing a mail folders is possible even

Permission was not checked when adding a guest permission to a mail folder. This has been solved by orderly checking permissions and deny operation.

DOCS-2049 dcs: errors with pxc_strict_mode=enforced on galera cluster

The table DATABASECHANGELOG needs no primary key, but the product strato uses needs this key. The reason for this is not clear. This has been fixed by adding a primary key to table DATABASECHANGELOG.

3 Changes relevant for Operators

3.1 Changes of Database Schema

Change #SCR-608 Support for "reply_to" field in new mail compose implementation

Support for "reply_to" field in new mail compose implementation through adding VARCHAR column "replyToAddr" to "compositionSpace" table. Related UpdateTask: com.openexchange.mail.compose.impl.groupware.CompositionSpaceAddReplyTo

4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs

OXUIB-260, OXUIB-252, OXUIB-251, OXUIB-246, OXUIB-183, MWB-328, MWB-323, MWB-311, MWB-282, DOCS-2049,
