2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5887.

OXUIB-515 Unable to Create Filter Rule using a Condition

Wrong timezone was selected when parsing date input.

This has been solved by using default timezone when parsing the date input.

OXUIB-507 Automatic opening of notification area setting needs a refresh or login/logout in order to work

The old value of autoOpenNotification was falsely used when changing the setting.

This has been solved by using the new value instead.

OXUIB-473 Recurring event in calendar cannot be deleted - 'Invalid recurrence rule [rule null]'

Orphaned change exceptions without corresponding series master event cause errors when being edited or deleted.

This has been solved by checking if series master exists before showing the dialog.

OXUIB-448 Floating events are not shown correctly in the list view

Utc timezone was used instead of local time.

This has been fixed by using local time when no timezone is given.

OXUIB-99 Pasted text in webmail in Android browsers disappears on Send

Missing editor event propagation when just pasting to editor on smartphones.

OXUIB-485 Context menu on folders are missing 'delete all messages' after marking/un-marking spam

When spam folder is empty and you move a mail to it (via "mark as spam") folder count was still 0.

This has been solved by adding a refresh of the folder.

MWB-653 Error while editing added mail account - Please enter the following data: primary_address

Primary address was unnecessary checked.

Don't require primary address when checking mail account connectivity to solve this issue.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

OXUIB-515, OXUIB-507, OXUIB-473, OXUIB-448, OXUIB-99, OXUIB-485, MWB-653,
