2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5923.

MWB-793 MySQL deadlock on delete user

Built-in retry mechanism does not work in case a MySQL deadlock error occurs, which suggests to restart transaction.

This has been solved by orderly passing SQLException as cause to wrapping StorageException to let built-in retry mechanism kick-in.

MWB-105 Update copyright year to 2021

Copyright notice in as-config-defaults.yml file was not aligned to current year.

This has been solved by changing copyright notice in as-config-defaults.yml file.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

MWB-793, MWB-105,
