2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5931.

OXUIB-647 Problem on read receipt: bad sender mail address

Primary address was used in all cases.

This has been fixed by adding recipient parameter when calling api.ack and in case mail was send to alias address also this one is used for ack.

OXUIB-602 Missing contact image in desktop notifications

With WebSockets disabled, desktop notifications for mail didn't fetch a contact image.

This has been solved by refactoring mail desktop notifications to use the same message style as with WebSockets enabled.

MWB-828 StackOverflowError on certain mail

Possible stack overflow (application recursed too deeply) while parsing addresses from an E-Mail header, which was syntactically broken.

This has been fixed by avoiding possible stack overflow (application recursed too deeply) while parsing addresses from an E-Mail header, which is syntactically broken. Display that message as well as possible.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

OXUIB-647, OXUIB-602, MWB-828,
